

## CERTIFICATION

November 9<sup>th</sup>, 2015

Based on the success of the demo road in 2013, Shengli Open-pit Coal Mine built another 19.8km EARTHZYME mine road in 2014. So far, the road has been subjected to heavy traffic including Komatsu 830E which average 320 T in weight over a year.

And also, it has been approved that the road performs well in flatness, strength and other performance indexes, it is benefit for the recovery of production after the rain and the reduction of cost, it has great significance in cost control, energy conservation and environment protection.

We hereby certify!
